

Dimension Mobile with Ballistic Armor Core™

The Egan Dimension Mobile equipped with the available Ballistic Armor Core™ provides multi-strike capabilities, buying precious time in an Active Shooter event and can be specified for environments where additional “shelter-in-place” options are desired. The Ballistic Armor Core meets National Institute of Justice Standard 0108.01, “Ballistic Resistant Protective Materials” Type III (High Powered Rifle) and all weapons rated lower, including 12-gauge rifle slug and “most handgun threats” including 44 Magnum, and 9mm. Level IV (Armor Piercing Rifle) can also be specified on the Egan Custom Response program. The specification of a Ballistic Core is not visually evident in the product, which otherwise has the clean, modern appearance of an Egan Dimension Mobile.
