EGAN BOLD™

The Postmodern Markerboard™, another Egan first. Many new professional environments are embracing old elements and using them in new ways — polished concrete, exposed wood, and metal are everywhere. Complement those environments — or add a postmodern splash to another environment, with Egan Bold — the postmodern markerboard.

Choose from a range of standard sizes or simply choose which size you want. The solid wood frame is then crafted from raw lumber in our factory. Specify the leather or textile of your choice — or supply us with your own — and we will wrap and hand-stitch it over the frame. For the guaranteed-clean surface infill, choose EVS™ technology or an Egan GlassWrite™ infill, available in thousands of colors. Custom painted for you in our factory, your Egan Bold is now complete.

DENIM

A staple in the fashion industry, this hard-wearing twill fabric has been a favorite among workers for centuries. Finely woven and hand-stitched over a solid wood frame, this tough fabric adds a postmodern appeal to any space.
