

# EganONE Dekke™

The EganONE Dekke™ starts with all the functionality of the EganONE Pro Cart™ and becomes a lectern-capable, standing-height collaboration center for small group impromptu sessions. Professional grade construction: Etex finish, robust and clean Clear Anodized (CA) aluminum verticals, laser-cut steel feet, and industrial strength, total-lock casters featuring a 220-lb weight rating per wheel.

Cabinet and drawer storage areas for binders, samples, and documents. Highly mobile, with its 4" diameter profiled wheels rolling easily across floor seams, small ridges, breaks, cables, elevator gaps, and other floor surface elements found in the modern or post-industrial workspace.

Technology capable: accomodates standard and short throw projectors. Inside, find an industry-standard AV rack with adjustable shelf. Additionally, the second or third decks can accommodate a laptop or keyboard as required. Front and back access doors provide easy access to equipment.
