

Tackable Wings

Tackable Wings are available in distinct tackable surface options; standard tackable Egan Fabric or Egan EcoTack™ included, or upcharge from Maharam Synergy Program. Both options feature a warp-free 3/8" tackable construction, factory-mounted on a 3/4" lightweight, recycled honeycomb core board, for an overall thickness of 1 1/8". Note: When installed beside a Dimension Stele™ Board the tackable surface is 1/8" proud to the adjacent EVS™ surface board. Available in Small Corner radius (1/8") or Large Corner radius (1 1/2") designs, with a Natural (NA), White (WH), or Custom Color (CC) edge on the board.
