

Minimalist, Frameless Design: Dimension Markerboards

A sleek, minimalist look, the Dimension design family is characterized by a frameless board wrapped in Egan's unique proprietary dry erase surface: EVS. EVS is a professional grade surface that delivers against 3 components: Guaranteed-to-clean even the toughest of stains, low gloss for a projection compatible surface, and a flexible design to cover large expanses. Design features are distinguished by its vanishing edge, a frameless surface with clean, crisp lines. Suitable for every professional environment, Dimension comes in a selection of standard sizes or may be specified as a custom size.
